5 WAYS
COIN RETURN

The Jofemar 5 ways coin return offers maximum reliability in the guidance of coins to their final destination. It is compatible with both CCTalk and Parallel protocols, and it has all the necessary accessories for its perfect mechanical installation. It features a coin guidance module in the entrance and an optional recovery engine, so it may be used in recreational machines and in other applications that require separating coins according to their value.

OPTIMAL SETUP CAPACITY

FRAUD PREVENTION SYSTEMS

ADAPTABILITY TO DIFFERENT PROTOCOLS

SECURITY

FEATURES
• Five different output tracks.
• CCTalk and Parallel protocols. It has dual operation, so the same coin return device can operate in both protocols.

STRUCTURE
• It is mechanically compatible with most of the machines on the market.

OPTIONS
• Electronic recovery engine.
• Extensible modular coin entry funnel depending on the needs and features of the machine in which it is installed.
