

NUUK

Efficient vending for
frozen products

TECHNOLOGICAL INNOVATION • RELIABILITY • 100% JOFEMAR TECHNOLOGY

The Nuuk vending machine is the new standard created by Jofemar for the automatic distribution of frozen products. Offering the highest security storing products always to the right temperature, with all the flexibility of the patented Jofemar dispensing system, adjustable to any kind of packaging, and also the best marketing tool thanks to its touch screen for product selections and publicity display. It also includes a complete managing system online through the powerful telemetry platform Jsuite.

FEATURES

- Fitted to deliver plates up to the following sizes: 175 x 210 x 50 mm. It can also vend ice bags and ice-cream without the need to add an additional container to the product.
- Flexible configuration that allows adjusting the channels to new products without tools.
- Smart temperature management, several sensors in different points of the cabinet.
- Programmable temperature expiration, inhibits the vend of products in case of temperature loss, with real time alerts.
- Soft delivery elevator at the consumer's hand height (delivery without harsh movements).
- FIFO (First In First Out) System. Continuous renewal with the freshest product.
- Correct sale detection with photocells.
- Automatic defrosting system.
- 21.5" interactive touch screen (Optional 32")

STRUCTURE

- Injected foam insulation system.
- Cabinet sealed with a motorized door lock, maximum dampness insulation.

CREDIT MANAGEMENT

- MDB Cashless readers

- Online management system through Jofemar's telemetry platform. Prices, stock control, new products, pictures and videos, all updatable by web access and in real time.
