Air

Payment and control
for machines

TAOS AIR

The Taos Air Pod is the smallest and most compact solution to include a cashless payment system in satellite vending machines. This installation of a multi-product vending point takes up less space making it comfortable and ergonomic for the user.

FEATURES

- Control unit with integrated payment systems capable of managing up to four dispensing units.
- Possibility of installing J-LINK communications system and J-SUITE telemetry system. Online operation, with real time control of users and sales if we integrate customer loyalty cards.
- Electrical power supply from satellite machine.
- Dimensions and weights: 337 x 185 x 953 mm / 9,7kg.

STRUCTURE

- Vandal-proof security lock.
- Cabinet structure treated against rust and corrosion.
- Standard hole for EVA size card readers.

PROGRAMMING

- Programming and data visualization system integrated and accessible accountants from within the machine.
- Compatible with the latest telemetry systems for the end-to-end remote machine management.
- DEX port with accounting data output.
