

INNOVATIVE DISPENSE & INTAKE SOLUTIONS

WHY CHOOSE ZUPLY

Smart collect & dispense solution

Zuply supplies smart dispensing and intake systems for use in different sectors, with a focus on savings in terms of stock, consumption and staffing, among other things.

Every company is unique, which is why the Zuply systems adapt to the needs of your organization. In brief, this means, for example, the possibility of linking the system to your existing software systems, the integration of company identity cards and even the delivery of machines in the look & feel of your company.

The Zuply solutions are flexible and future-proof. They are suitable for dispensing and taking in all kinds of (fresh) products and accessories. The modular hardware is easy to connect and expand at a later stage and can thus grow with your organization.

A characteristic feature of the Zuply systems is ease of use for both end users and suppliers. Everything is focused on operating the machine with minimal effort and time. The operating software offers a range of smart functions, works with the latest technology and is constantly improved and expanded.

Maximum control of your stock with the Zuply systems: insight into dispensing operations, empty notifications and direct availability at the workstation. Increase the sustainability level of your organization and create awareness of consumption among your employees.

Zuply provides various SLAs that are in perfectly in line with your organization. For our on-site service we work with renowned service organizations. This service we can offer in most EU countries and starting in USA and Canada.

The advantages of Zuply at a glance

- ❑ 24/7 availability for your customer and or employee
- ❑ Time saving: the Zuply systems are unmanned and can be placed close to the work-place
- ❑ Save time in Operations: due to the smart (remote) functionality for operational staff it takes even less time operate Zuply solutions
- ❑ Real-time insight
 - Stock: savings on items that are unnecessarily in stock
 - Consumption frequency
 - sales
 - Ordering advice
- ❑ Preventing & control waste
- ❑ The Zuply systems are modular and can be expanded at any time
- ❑ Maximum functionality: Parcel, virtual checkout, dispensing, intake, click & collect orders, rentals and loaners
- ❑ For a wide range of branches: Industry, Catering, Agriculture, Medical, IT & Office, Retail, Airports and Parcel

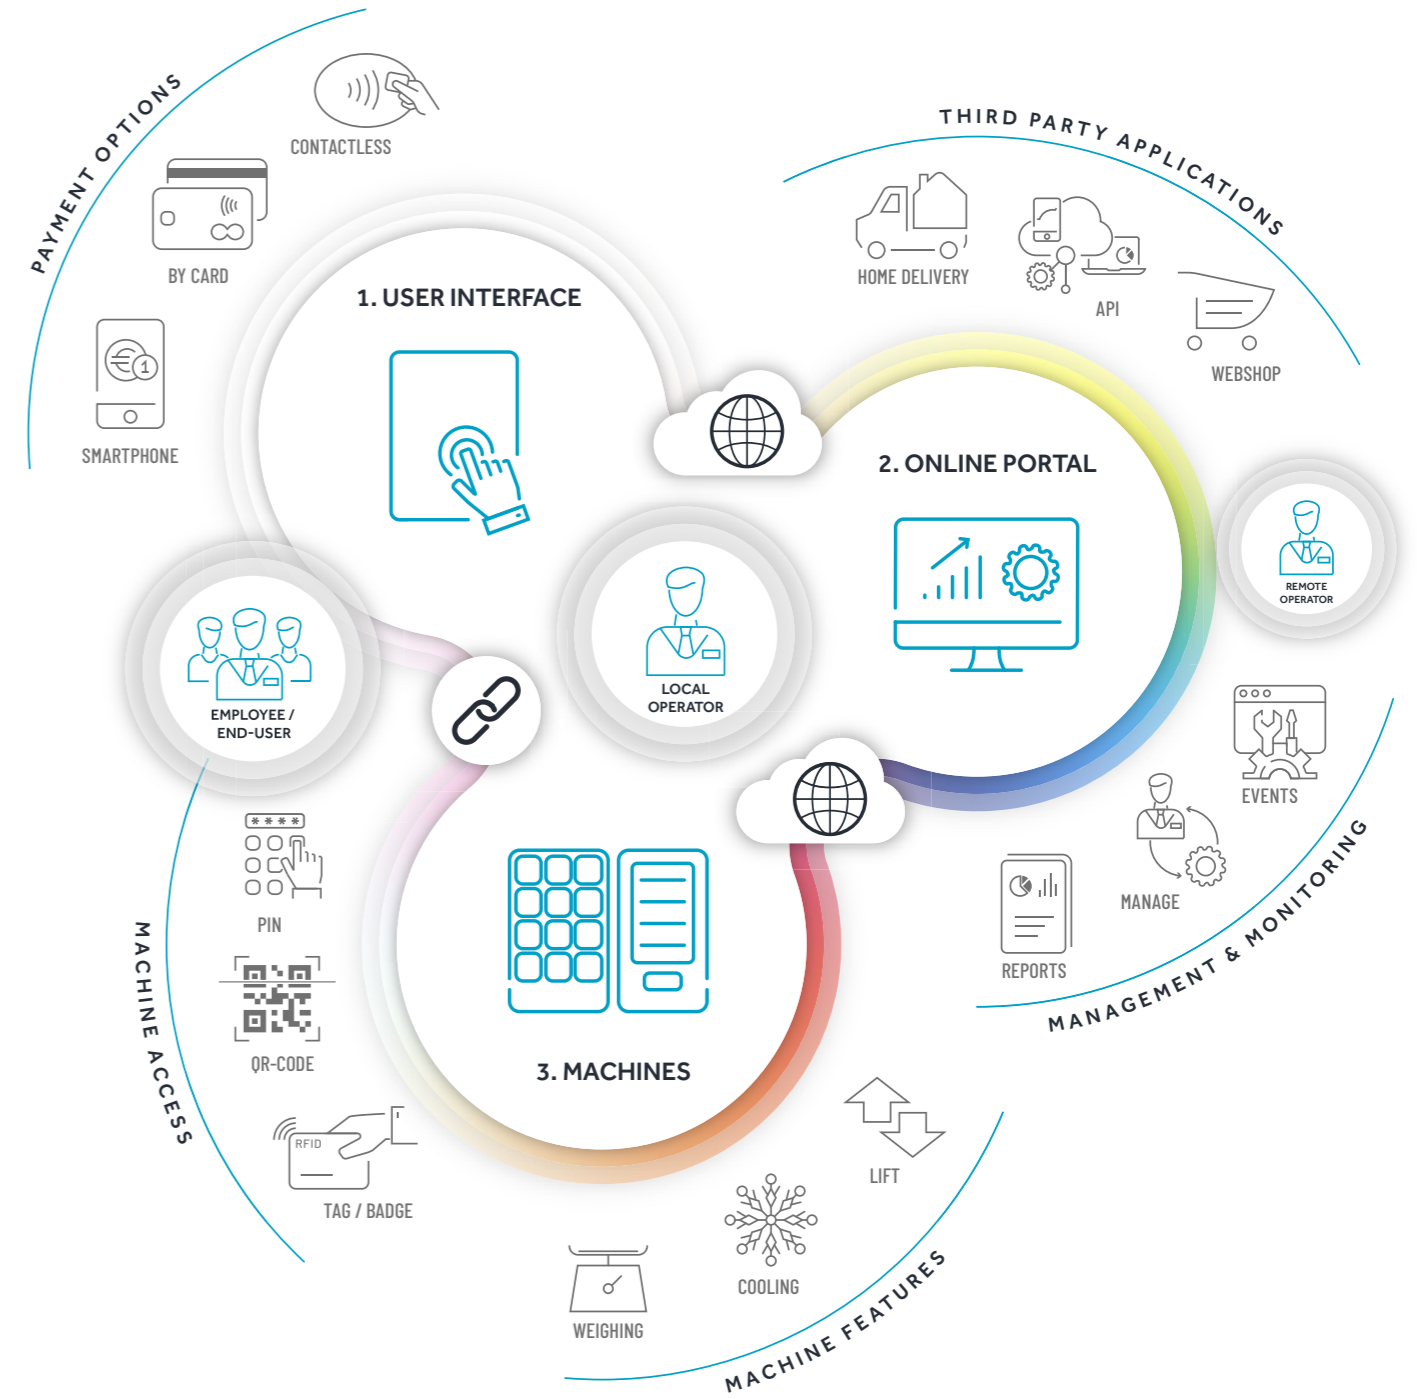

HOW IT WORKS

in a nutshell

All Zuply solutions, regardless of size, shape and application, always work in the same way, as shown schematically on the right page.

Zuply IT solutions are based on the following three pillars:

- 
1. User interface | VendingUI
 - Payment, cash and cashless, a wide range of payment hardware is certified and supported
 - Identification (various verification systems are supported) and user registration
 - Choice of functionality: Parcel, rental, dispensing, intake, click & collect orders, loaners
- 
2. Online Portal | VendingWeb
 - Management & Monitoring;
 - Can be connected to external systems
- 
3. Machines | Dispense and collect
 - Smart Fridge
 - Locker systems
 - Pusher machines

1. USER INTERFACE

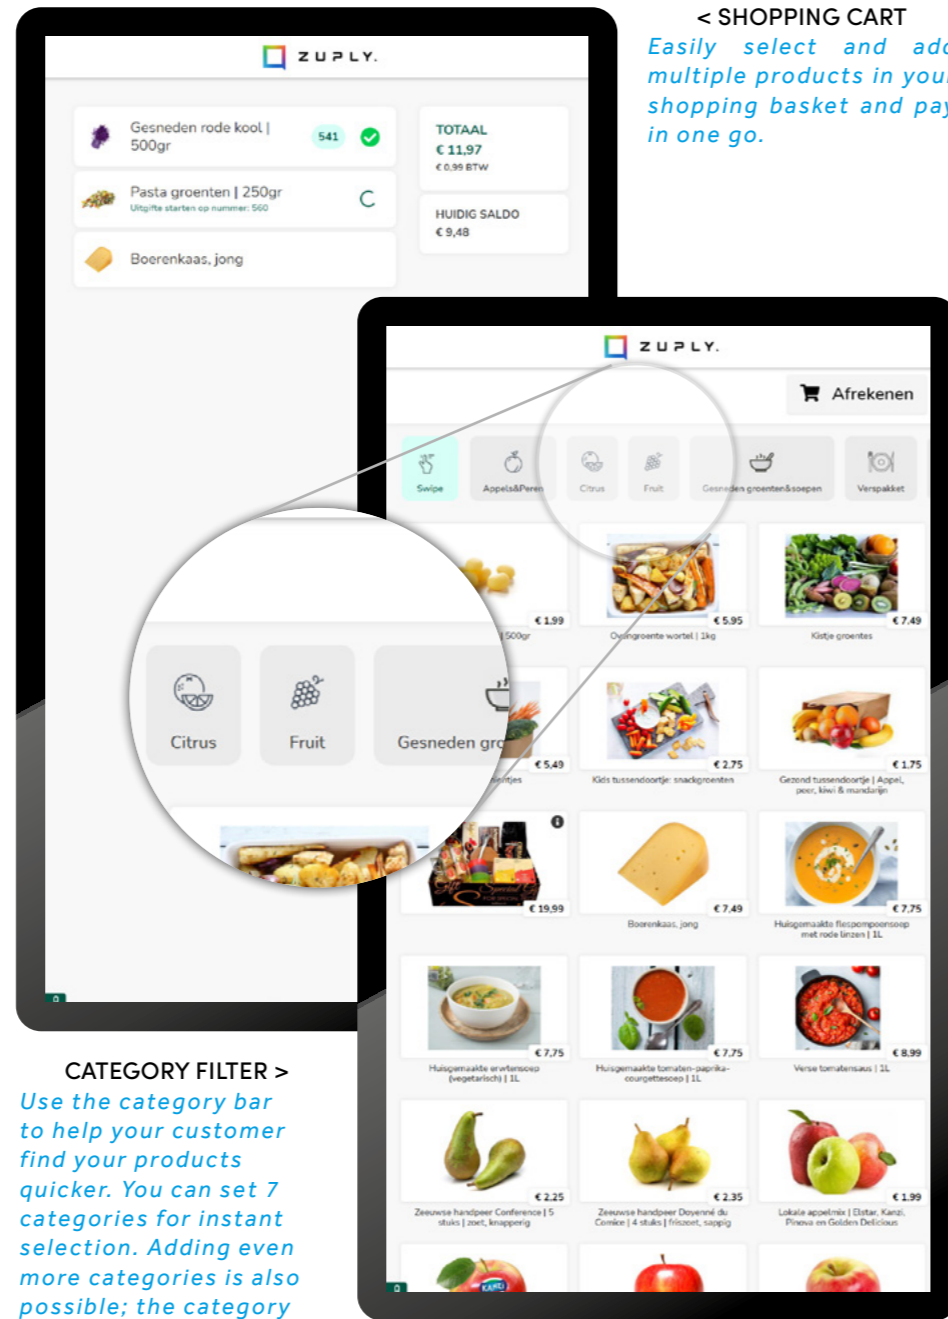

VendingUI

User Interface

Our user interface offers various ways of product selection. The product selection grid, where you select the product by images, subsequently you have the possibility to select with position number or have the combination of both. The product selection grid can be either 2, 3 or 4 columns wide, depending on the amount of products you want to show at first glance. In our portal Vendingweb we register the latest refill times.

- ❑ **Productgrid** | Up to 20 items immediately visible, scroll to see more items. Ordering on the screen can be set in the online portal. Product tags are shown when items are out of stock, have discount or are promotional (e.g. combi-deal)
- ❑ **Categories** | Quickly browse the available products using categories
- ❑ **Product info** | Add texts (ingredients, nutritional values or allergens) or photos
- ❑ **Pricing / promos** | Manage your prices and use the promotional tools (e.g. combi deals) to boost your sales
- ❑ **Advanced shopping cart** | Selected items end up in your shopping cart; all items are paid and dispensed at once
- ❑ **Multilingual** | Optionally, you can set up different languages, so even non-native employees and/or users can easily operate the machine

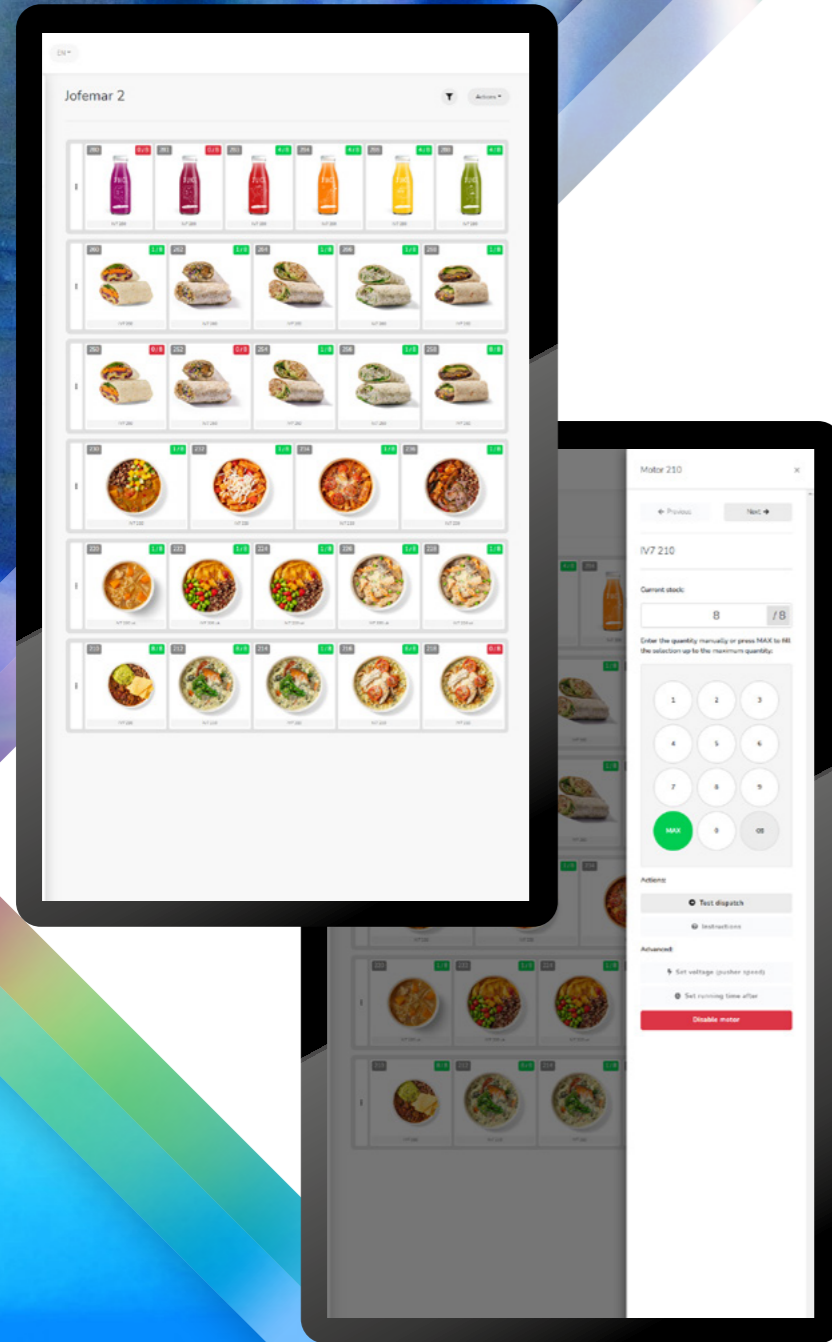

< SHOPPING CART
Easily select and add multiple products in your shopping basket and pay in one go.

CATEGORY FILTER >
Use the category bar to help your customer find your products quicker. You can set 7 categories for instant selection. Adding even more categories is also possible; the category bar will be enabled for horizontal scrolling automatically.

DISCOUNT VOUCHERS
Start an online promotion and provide discount vouchers to your customer. By adding the codes and value in the online portal, your customers can easily redeem the discount on the FlexTop2 by scanning the voucher. A QR-code scanner is required for this feature.

< Flex refill Menu

New & improved refill menu. The most complete and intuitive menu we have ever build. Easy to operate, simple and fast. We also included a tutorial, so new employees are easily trained using Flex. It offers all features as described with LockBlox but also specific functions for the Flex, like:

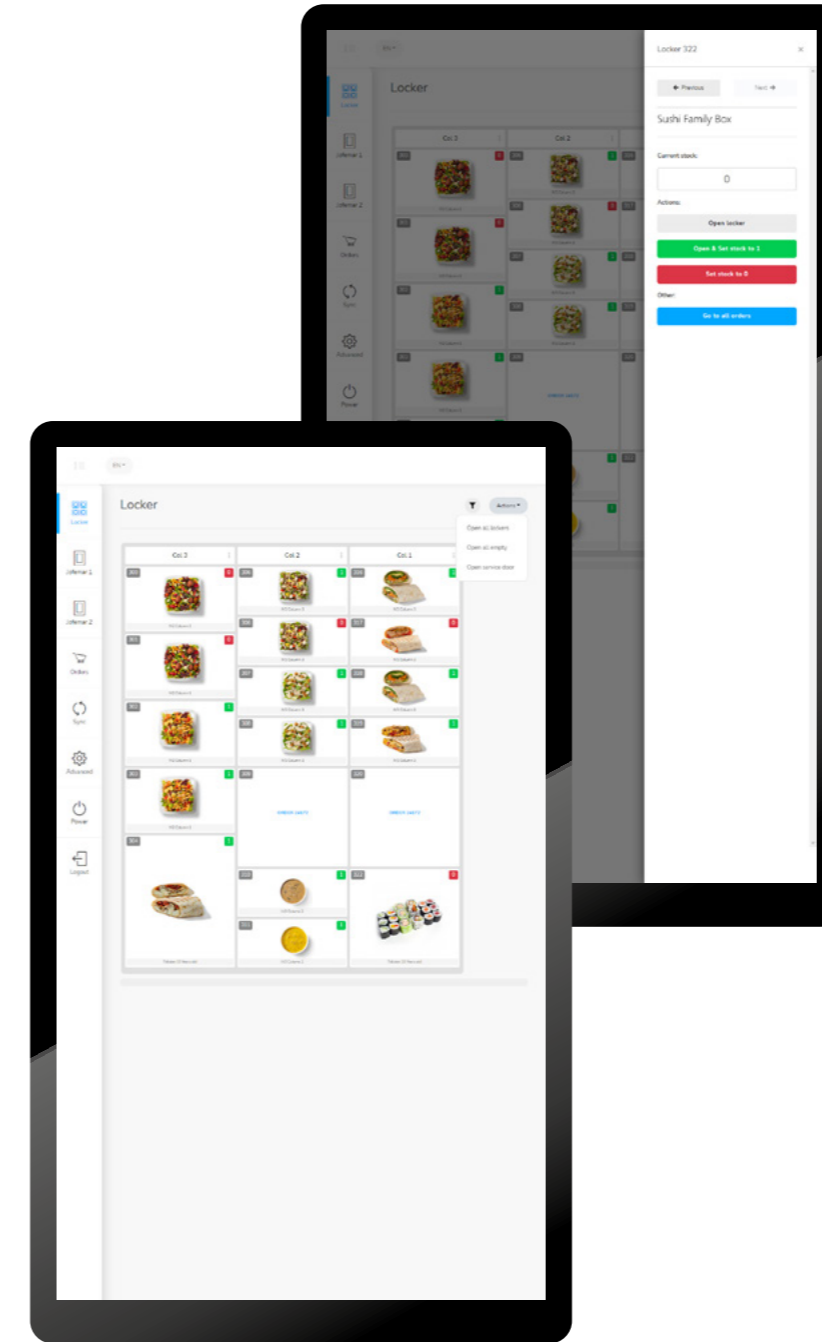

- ❑ **Stock levels** | Easily change stock levels per pusher or per row
- ❑ **Disable/enable motors** | Prepare orders online or create them at the machine
- ❑ **Product testing** | Easy to adjust pusher settings (time and voltage) and perform a test dispatch
- ❑ **Hide / show attributes** | You are able to customize the refill menu to show or hide various attributes, like product name or photo
- ❑ **Unlock front-kit** | Within the refill-menu you can unlock the front-kit. This action is registered in VendingWeb, so you can always see who had access to the machine at a certain time (only for FlexTop2)

LockBlox refill menu >

New & improved refill menu. The most complete and intuitive menu we have ever build. Easy to operate, simple and fast. Providing features like: open only the empty ones, or a complete column with just one push. We also included a tutorial, so new employees are easily trained using LockBlox

Offers the following functionality

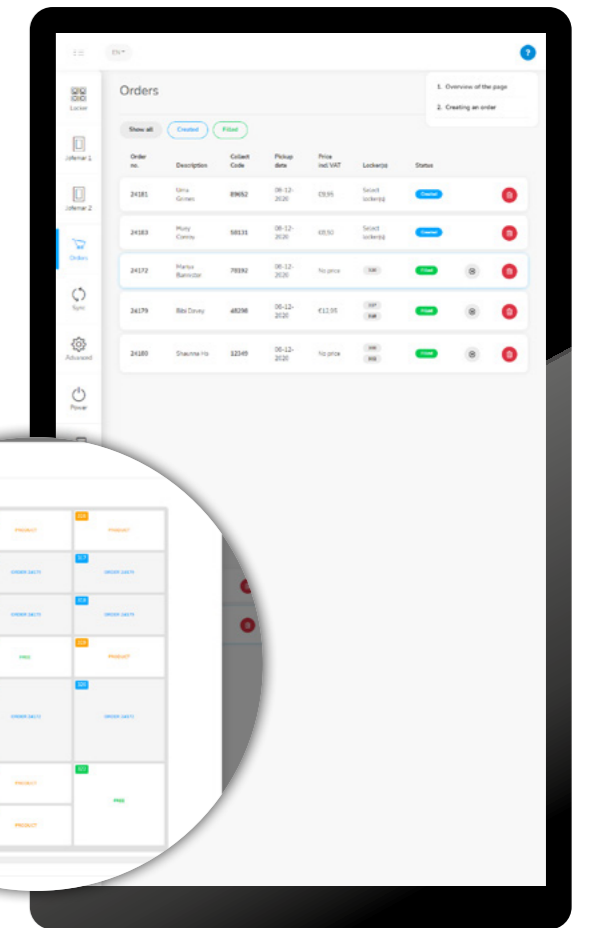

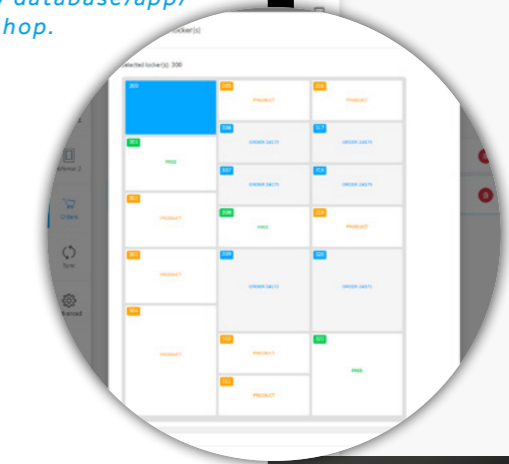

- ❑ **Stock levels** | Easily change stock levels per box or per column
- ❑ **Shortcut to orders** | Prepare orders online or create them at the machine
- ❑ **Test Dispatch** | Open the door without changing the box status to filled
- ❑ **Hide / show attributes** | Customize the refill menu to show or hide various attributes, like product name or photo
- ❑ **Tutorial** | how to create a click & collect order, or how to adjust the stock levels

VendingUI

ORDERS >
Easily add click & collect orders and generate unique collect codes.
In case the machine is connected over the API, it will synchronise automatically all orders. Just select the right order, fill it and the status is automatically sent over the API to the third party database/app/webshop.

2. ONLINE PORTAL

VendingWeb

All Zuply solutions can be monitored and managed via the online portal VendingWeb. This allows you to monitor all transactions (incoming and outgoing) and events, as well as change products. You can even dispense products remotely; handy and fast where prior approval for a product is required.

The dashboard gives you a direct insight into the status of your machines, verification and payment systems. ZuplyWeb is accessible from virtually every browser and is also available in a mobile version.

- Management
 - Product info (text, photos, translation)
 - Adjusting and activating prices
 - Remote dispensing
 - Employee access
 - Changing configurations
- Reporting
 - Turnover and dispensing operation (periodically)
 - Consumption (per employee)
 - Stock insight
 - Export to Excel (.csv or .xlsx)
- Service & events
 - Overview of error messages
 - Remote service and updates

CONNECT TO
YOUR
ERP SYSTEM

Zuply also offers customized solutions, so that you can also have your own systems work together with the Zuply solutions, such as:

- Automated ordering of items
- Automatically sending pickup orders to the machine
- Consumption reporting directly in your records
- Processing tickets directly with your existing software package

3.PUSHER SYSTEM

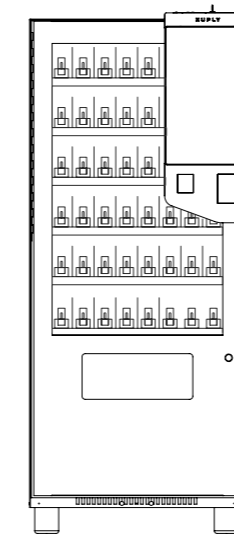

Flex Top2

The Zuply Flex is equipped with a smart pusher system, which allows the dispensing of almost any type of IT accessory. The machine has six standard product compartments and can dispense up to 60 different items.

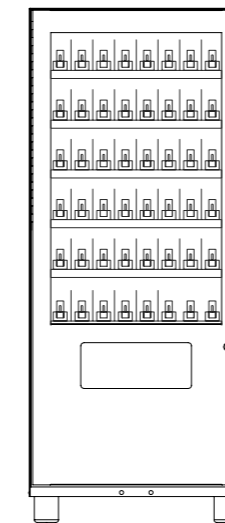

The Zuply Flex is characterized by its ease of use for both the end user and the machine supplier. The Moove product lift brings the IT accessories to the dispatch unit. The Flex can be equipped with various verification and/or payment systems.

- ❑ **Smart pusher system** | can be flexibly configured to suit specific product packaging
- ❑ **Product lift** | takes delicate products to the dispatch unit in a controlled manner
- ❑ **Electronic lock** | the front-kit is equipped with an electronic lock to control access to the machine. No more physical locks needed, just use QR-code, RFID-tage or personal PIN-code to open the machine
- ❑ For the dispensing of almost every product, from perishable food to valuable IT accessories
- ❑ Easily expandable with one or more Flex Satellite machines or LockBlox® system

VERIFICATION

machine access

Machine access can be given in various ways, namely via a PIN code, RFID card or QR/ Barcode. Combinations of these systems are also possible.

In ZuplyWeb you can add and manage your employees. With the option 'user groups' you can show or hide selected products for your employees.

❑ **PIN code** | Low threshold, no physical card or badge required.

❑ **RFID card/badge** | This can be a company card or badge, but also a badge supplied by Zuply

❑ **QR code** | Easy to generate and send. QR code can also be read from a smartphone screen

PAYMENT

buying products

The Zuply solutions can be equipped with various cashless payment systems. These can also be used in combination with verification systems.

With the addition of a payment system, employees can buy products from the Zuply machines. In this way, employees can make use of any purchasing advantage the organization has.

❑ **Contactless payments** | Suitable for bank cards, credit cards and smartphones that support contactless payments

❑ **Debit- / Credit card payment** | Acceptance of bank cards, credit cards and smartphones, both contactless payments and debit card payments are supported

❑ **Internal payment systems** | Possibility to link internal payment systems. Ask for the possibilities/conditions
